Nominated Representative

Complete the next section to appoint a Nominated Representative for your business.

Key information

If possible, please ensure the email address provided in this form for the Nominated Representative is different to any email address recorded for the Nominated Representative against any personal ActewAGL electricity or gas account.

Where the email address provided is recorded against multiple ActewAGL accounts, all the details recorded against these accounts need to match. For example, if the same email address is used for a personal and business account, the name, date of birth and mobile phone number also need to match across the accounts.

If the Nominated Representative is **not** currently an authorised contact on the account, appointing them as a Nominated Representative will not change this. The Nominated Representative will remain unable to maintain the business' ActewAGL energy account(s).
